

Large Format, High-Resolution  
**SCANNING SERVICE**

Our **CRUSE Synchron 40x60 table scanner** offers non-contact scanning under perfectly homogenous, stable lighting.

Artists appreciate the unique lighting combinations that ensure faithful reproduction of even the finest surface textures.

And we can scan framed art, even under glass!

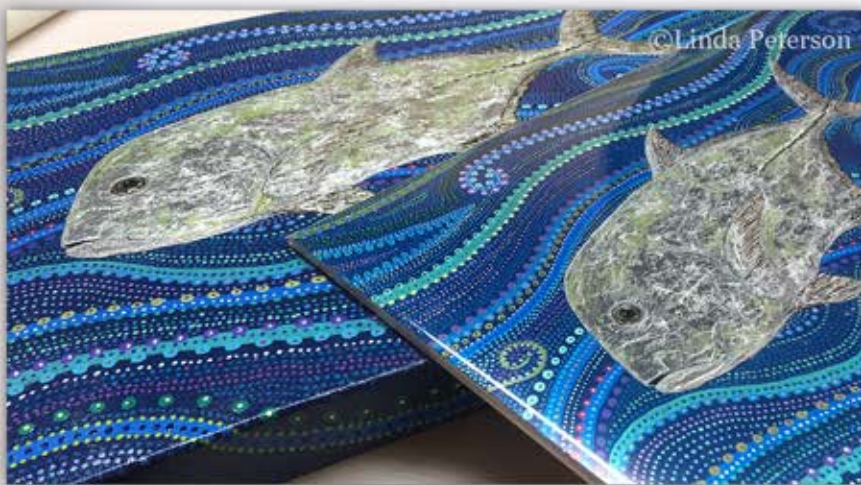

Let us capture every detail of *your* work of art!

Even today's most advanced equipment won't record all colors exactly the same way the eye sees them. Most scans will need some color adjustment to bring them into line with the original. Because of that we offer 3 levels of scanning:

**Raw:** For the individual who has a thorough understanding of color management and desires to perform (or obtain elsewhere) their own color manipulation. Your art will be scanned full size at 360ppi and copied directly to your provided flash drive, with no adjustments of any kind.

**Standard:** 90% of our scans fall into this category. Your art is scanned full size at 360ppi. We run tests and make the necessary corrections to bring the tones and colors of the digital file to within 90-95 % of the original, print a proof on the media of your choice and copy the final file onto your provided flash drive.

**2nd Tier:** For those artists for whom exact color matching is critical, we will perform additional spot proofing; making further adjustments and printing test strips at a fee of \$80/hr, in 1/4 hour increments.

Fee Schedule:	Raw	Standard
Up to 8x10	\$40	\$75
Up to 16x20	\$60	\$95
Up to 18x24	\$75	\$120
Up to 20x30	\$90	\$135
Up to 24x36	\$105	\$150
Up to 30x40	\$125	\$175
Up to 36x48	\$140	\$200
Up to 40x60	\$155	\$220
